# Understanding our Packaging Terms

## What is “Recyclable”? ♻️

A material is recyclable when it can be collected, processed, and re-manufactured into new products. At SCY Venture Group, our recyclable packaging supports a sustainable lifecycle by reducing waste and promoting the circular use of resources. Once properly cleaned of food residue, these materials are efficiently processed through standard recycling systems to protect our natural environment.

## What is ‘Food Grade’? 🍴

Food-grade packaging refers to materials certified safe for direct contact with food and beverages. Our products meet strict safety standards to ensure no transfer of harmful substances, odors, or flavors. Specifically, SCY’s food-grade paper and board utilize regulated coatings and inks, ensuring maximum hygiene and freshness for catering, takeaway, and food service applications.

## How We Measure Our Products

All product measurements in this catalogue are provided in centimetres (cm), cubic centimetres (cc), millilitres (ml), and grams (g) as applicable.

## Material Overview:

### Acrylic (Polymethyl Methacrylate – PMMA)

A lightweight, clear plastic with excellent clarity and impact resistance. Available in UV-resistant and anti-glare finishes for diverse applications.

### Polycarbonate (PC)

An exceptionally strong, clear material with high impact resistance, commonly utilized for safety glazing, protective shields, and greenhouses.

### Polyethylene (PE)

A cost-effective, flexible plastic resistant to heat and chemicals; ideal for laboratory equipment, automotive parts, and food containers.

### Polyethylene Terephthalate (PET)

A lightweight, recyclable material offering high moisture resistance, widely used for beverage packaging, textiles, and durable consumer goods.

### Polyvinyl Chloride (PVC)

A versatile plastic available in rigid or flexible forms, standard for piping, window frames, medical tubing, and packaging.

### Acrylonitrile-Butadiene-Styrene (ABS)

A tough, impact-resistant polymer with a premium surface finish, perfect for automotive components, luggage, and electronic appliance housings.

### High-Density Polyethylene (HDPE)

A strong, chemical-resistant plastic providing long-lasting performance for bottles, industrial piping, and various household containers.

# Terms & Condition:

**1 Product Specification:** All product will be manufactured according to the specifications agreed upon in the quotation or invoice. SCY Venture Group Sdn Bhd will not be responsible for discrepancies after customer approval. +-20% in production is normal as standard manufacturing procedure.

# Memahami Terma Pembungkusan Kami

## Apa itu “Boleh Dikitar Semula”? ♻️

Sesuatu bahan dianggap boleh dikitar semula apabila ia boleh dikumpul, diproses, dan dihasilkan semula menjadi produk baharu. Di SCY Venture Group, pembungkusan boleh kitar semula kami menyokong kitaran hayat yang mampan dengan mengurangkan sisa dan menggalakkan penggunaan sumber secara berulang (ekonomi kitaran). Setelah dibersihkan dengan betul daripada sisa makanan, bahan-bahan ini boleh diproses dengan cekap melalui sistem kitar semula standard bagi melindungi alam sekitar semula jadi.

## Apa itu “Gred Makanan”? 🍴

Pembungkusan gred makanan merujuk kepada bahan yang diperakui selamat untuk sentuhan langsung dengan makanan dan minuman. Produk kami mematuhi piawaian keselamatan yang ketat bagi memastikan tiada pemindahan bahan berbahaya, bau, atau rasa. Secara khusus, kertas dan papan gred makanan SCY menggunakan salutan dan dakwat terkawal, memastikan tahap kebersihan dan kesegaran maksimum untuk aplikasi katering, bawa pulang, dan perkhidmatan makanan.

## Gambaran Keseluruhan Bahan:

### Akrilik (Polimetil Metakrilat – PMMA):

Plastik ringan dan jernih dengan ketelusan tinggi serta rintangan hentakan yang baik. Tersedia dalam kemasan tahan UV dan anti-silau untuk pelbagai kegunaan.

### Polikarbonat (PC)

Bahan jernih yang sangat kuat dengan rintangan hentakan tinggi, lazim digunakan untuk kaca keselamatan, perisai pelindung, dan rumah hijau.

### Polietilena (PE)

Plastik fleksibel dan kos efektif yang tahan haba serta bahan kimia; sesuai untuk peralatan makmal, komponen automotif, dan bekas makanan.

### Polietilena Tereftalat (PET)

Bahan ringan dan boleh dikitar semula dengan rintangan kelembapan yang tinggi, digunakan secara meluas dalam pembungkusan minuman, tekstil, dan barangan pengguna tahan lama.

### Polivinil Klorida (PVC)

Plastik serba guna yang tersedia dalam bentuk keras atau fleksibel, digunakan secara meluas untuk paip, bingkai tingkap, tiub perubatan, dan pembungkusan.

### Akrilonitril-Butadiena-Stirena (ABS)

Polimer yang kukuh dan tahan hentakan dengan kemasan permukaan premium, sesuai untuk komponen automotif, bagasi, dan perumah peralatan elektronik.

### Polietilena Berketumpatan Tinggi (HDPE)

Plastik yang kuat dan tahan bahan kimia, menawarkan prestasi tahan lama untuk botol, paip industri, dan pelbagai bekas kegunaan rumah.

## How We Measure Our Products

All product measurements in this catalogue are provided in centimetres (cm), cubic centimetres (cc), millilitres (ml), and grams (g) as applicable.

# Terma & Syarat:
